the lighthouse

The brown and white lop eared bunny is sitting in the corner.
The loaf of bread is cooling on the rack.
Lag bolts have flat heads and sharp points.
The rope makes a loop around the bollard.
There is a one lane bridge ahead.
The lone pine grew on the slope.
Trees line the middle of the lane.
The lush foliage of the vine has purple flowers.
The gentle waves lapped against the long sandy beach.
The lima beans are ready to serve.
The long black limo is parked in front of the pier.
The sign lets us know that the speed limit is 30 miles per hour.
The moon turned orange during the lunar eclipse.
The sugar was left open and has formed into a large lump.
The lens has been taken off the camera.
The trap collects lint in the dryer.
The list shows all of the materials for the experiment.
Someone left a wet footprint on the flagstone.
The lock is used to link the two parts of the chain.
The lighthouse helps boats stay away from the shore.

Water is falling down the waterfall.
Willow leaves are long and thin with one vein in the middle.
These horses are pulling a heavy wagon.
The bricks are stacked on the pallet.
The two silos have domed tops.
The pilings are tied together at the top with thick rope.
This pipeline is used to carry oil to the refinery.
They will use a shotline to connect two boats.
There is an alpine meadow beneath the snow covered peaks.
Raisin bread tastes good with plum jelly.
The high rise hotel has a balcony for each room.
The foliage of a banana plant is red and green.
The coliseum was built by the Romans long ago.
The trolley has made a stop to pick up passengers.
She is pushing the baby in the stroller.
There are many tall buildings in the busy metropolis.
There is a white trellis on the path to the house.
Be very careful when you step on the escalator.
The water lily has one blossom.
The yellow flowers have many petals.

medieval times

There are many doors opening into the hall.
The small saw mill can cut large logs.
Keep pouring to fill the glass with soda.
The stone wall has jagged rocks on top.
The farmer is shearing the wool from the sheep.
If the waves are too big, pull your kayak out of the water.
The foal is looking right at us.
The onion has a thin white skin that we must peel off.
There is a pile of bark under the wheelbarrow.
The water boiled and the kettle began to whistle.
These African cattle have very long horns.
The wood on the deck is cut at an angle.
One petal has a brown mark on it.
Some of the fingers are bent at the knuckle.
The windmill is used to pump underground water.
The formal dinner setting has two glasses.
Our tour guide always had a friendly smile.
The wire on one spool has white specks on it.
The scale is used to weigh materials to make glazes.
This building looks like it was built in medieval times.
